## Digital Cameras - The Basics -

2hr x 2 Weeks - FREE

### Course Description

This 2 week course is aimed at anyone who may have recently purchased, or is thinking of buying a digital camera and wants some tips on how to use it.

In the first week we will look at the basics of using your camera, such as how to take a photograph, changing the settings of the camera for different occasions and transferring the picture to a computer.

In the second week we will look at organising the images on your pc as well as copying the images on to CDs and USB storage devices and printing options that are available to you.
