

Quest

Introduction to Digital Cameras

4 Weeks, FREE

This 4 week course is aimed at anyone who may have recently bought, or is thinking of buying a digital camera and wants some tips on how to use it. **Some experience of using computers is required. Note this is not a course on photography techniques.**

All of our [Quest](#) courses are flexible and student-driven; however the following areas will be covered on the course:

- **Getting Started:** This will be a general introduction looking at what to look for when buying a camera. Using our own cameras, you will learn the basics of how to use it.
- **Burning Images on to CD and Printing:** This session will show how to copy the images from the computer onto a CD for safe storage and cover the various methods you can use to print your digital photographs.
- **Downloading, Installing and Using Software:** Download and install free software that will allow you to edit the images from your camera.
- **Create an On-line Photograph Album:** This will allow you to share your photographs with friends and family throughout the world without having to attach photos to emails.

For information on dates, times and locations, please see our latest [Quest](#) timetable and booking forms - available in all libraries or online at www.libraryonline.org.uk
